## DETAILED ACTION

### *Double Patenting*

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-15 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-9, 11-16 of prior U.S. Patent No. 6,329,973. This is a double patenting rejection.

The term "AND functional circuit" in the independent claims of the present application and the term "AND logical circuit" in the allowed independent claims of the prior U.S. Patent No. 6,329,973 are directed to the same AND gate circuit, therefore, claims 1-15 of the present application are claiming the same invention as that of claims 1-9, 11-16 of prior U.S. Patent No. 6,329,973.

3. Applicant's remarks regarding the preliminary amendment filed on 10/15/01 has been noted. However, such indication of the preliminary has been indicated in the last office action by the examiner, specifically note "Responsive to communication(s) filed on 15 October 2001" which include the preliminary amendment filed on this date.

4. Applicant's arguments filed 4/25/2002 have been fully considered but they are not persuasive.

Applicants' remarks regarding the 101 double patenting are not persuasive. The specification **only** discloses an AND gate circuit 47 for performing an AND function and is implemented with a digital circuit, the specification does not disclose or include any analog circuit (such as an operational amplifier) which performs an AND function. Therefore, in light of the specification, both the AND logical circuit in the patented claims and the AND functional circuit in the present claims are directed to the same AND gate circuit 47, there is no any other AND functional circuit (for example, analog circuit) to perform the AND function other than the AND gate circuit 47. Therefore, the two recitations are directed to the same circuit and are of the same scope.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
